Serial No.: 10/826,522 - 4 - Art Unit: 1633

Conf. No.: 2890

## In the Claims

Please replace all prior versions, and listings, of claims in the application with the following list of claims:

1.-29. (Canceled)

- 30. (Original) A micro-organism, comprising an expression vector that encodes and is capable of producing dsRNA, in which said expression vector comprises a promoter or promoters oriented relative to a DNA sequence such that the promoter or promoters initiate transcription of said DNA sequence to double stranded RNA upon binding of a transcription factor to said promoter or promoters.
- 31. (Original) A micro-organism according to claim 30, in which said expression vector comprises two identical promoters flanking said DNA sequence.
- 32. (Original) A micro-organism according to claim 30, in which said expression vector comprises said DNA sequence in a sense and an antisense orientation relative to said promoter or promoters.
- 33. (Original) A micro-organism according to claim 30, in which said transcription factor is a phage polymerase.
- 34. (Original) A micro-organism according to claim 33, in which said promoter(s) is/are selected from the group consisting of T7, T3 and SP6 promoter(s).
- 35. (Original) A micro-organism according to claim 30, wherein said micro-organism is adapted to express said transcription factor.
- 36. (Original) A micro-organism according to claim 35, wherein said transcription factor is T7 polymerase.

Serial No.: 10/826,522 - 5 - Art Unit: 1633

Conf. No.: 2890

37. (Currently amended) A micro-organism according to claim 30, in which said DNA sequence has been derived from obtained from *C. elegans*.

- 38. (Original) A micro-organism according to claim 37, in which said DNA sequence is a *C. elegans*-derived cDNA or cDNA fragment.
- 39. (Original) A micro-organism according to claim 30, wherein the micro-organism is a bacterium.
- 40. (Original) A micro-organism according to claim 39, wherein said bacterium is *E. coli*.
- 41. (Original) A micro-organism according to claim 40, wherein said *E. coli* is a RNAse III negative strain.
- 42.-54. (Canceled)
- 55. (Withdrawn) A method for introducing double stranded RNA (dsRNA), or an expression vector that encodes and is capable of producing dsRNA, into *C. elegans*, comprising

feeding to *C. elegans* a micro-organism comprising an expression vector that encodes and is capable of producing dsRNA, in which said expression vector comprises a promoter or promoters oriented relative to a DNA sequence such that the promoter or promoters initiate transcription of said DNA sequence to dsRNA upon binding of a transcription factor to said promoter or promoters.

- 56. (Canceled)
- 57. (Withdrawn) A method according to claim 56, in which said expression vector comprises two identical promoters flanking said DNA sequence.
- 58. (Withdrawn) A method according to claim 55, in which said expression vector comprises said DNA sequence in a sense and an antisense orientation relative to said promoter or promoters.

Serial No.: 10/826,522 - 6 - Art Unit: 1633

Conf. No.: 2890

59. (Withdrawn) A method according to claim 55, in which said transcription factor is a phage polymerase.

- 60. (Withdrawn) A method according to claim 59, in which said promoter(s) is/are selected from the group consisting of T7, T3 and SP6 promoter(s).
- 61. (Withdrawn) A method according to claim 55, in which said micro-organism is adapted to express said transcription factor.
- 62. (Withdrawn) A method according to claim 61, in which said transcription factor is T7 polymerase.
- 63. (Withdrawn) A method according to claim 55, in which said *C. elegans* is adapted to express said transcription factor.
- 64. (Withdrawn) A method according to claim 63, in which said transcription factor is T7 polymerase.
- 65. (Withdrawn) A method according to claim 55, in which the micro-organism is a bacterium.
- 66. (Withdrawn) A method according to claim 65, in which the bacterium is E. coli.
- 67. (Withdrawn) A method according to claim 66, in which the *E. coli* is a RNAse III negative strain.
- 68. (Withdrawn) A method according to claim 55, in which the *C. elegans* is DNAse deficient.
- 69. (Withdrawn) A method according to claim 68, in which the DNAse deficient *C. elegans* is a nuc-1 mutant.

Serial No.: 10/826,522 - 7 - Art Unit: 1633

Conf. No.: 2890

70. (Currently amended) A micro-organism according to claim 30, in which said DNA sequence has been derived from obtained from a pest.

- 71. (Previously presented) A micro-organism according to claim 70, in which said pest is a parasitic pest.
- 72. (Previously presented) A micro-organism according to claim 70, in which said pest is a nematode.
- 73. (Previously presented) A micro-organism according to claim 72, in which said nemaktode is a parasitic nematode.
- 74. (Previously presented) A micro-organism according to claim 70, in which said DNA sequence is a cDNA or cDNA fragment.
- 75. (Withdrawn and currently amended) A method according to claim 55, in which said DNA sequence has been derived from obtained from a pest.
- 76. (Withdrawn) A method according to claim 75, in which said pest is a parasitic pest.
- 77. (Withdrawn) A method according to claim 75, in which said pest is a nematode.
- 78. (Withdrawn) A method according to claim 77, in which said nematode is a parasitic nematode.
- 79. (Withdrawn) A method according to claim 75, in which said DNA sequence is a cDNA or cDNA fragment.
